[Tuesday Main Recording](#)

[Wednesday Main and Ambulatory Breakout Recording](#)

[Wednesday Acute Breakout Recording](#)

Day 1 | Tuesday, May 11

10 a.m. Welcome and Opening Remarks

Steve Jones, MD, MPH, Lead Physician Informaticist, MEDITECH

10:15 a.m. Show and Tell

Anne Whitworth, MD, CMIO, St. Luke's Hospital

Andrew Burchett, DO, CMIO, Avera Health

Jennifer McKay, MD, Medical Information Officer, Avera Health

Michelle Brousseau, Associate Vice President, MEDITECH

Hear from early adopters on new initiatives: [High Availability Snapshot](#), [Expense NOW](#), [Virtual Assistant](#), and [Virtual On Demand Care](#).

11 a.m. Improving the Physician Experience through Advancing Technology

Rebecca Lancaster, Senior Manager, Strategy, MEDITECH

Dan Lade, Software Designer, Product Development, MEDITECH

MEDITECH continues to invest in technology to improve the physician experience. Join us for demonstrations of some of our latest development initiatives — ordering with Virtual Assistant, dictation app, and ExpenseCam — and provide feedback that will help shape our products.

Day 2 | Wednesday, May 12

10 a.m. Group Think: Elevating the EHR

We want your help to make Expense evolve with you and your organization. Join our acute or ambulatory breakout session and tell us what you think is needed to elevate the EHR and take it to the next level. *The acute session will be moderated by Dr. William Gustin, MEDITECH Medical Consultant, MEDITECH, and the ambulatory session will be moderated by Dr. Steve Jones, MPH, MEDITECH Lead Physician Informaticist.*

11:30 a.m. Genomics: Looking Forward

Douglas Janowski, MD, Senior Physician Advisor, Information Technology and Clinical Integration, Willis-Knighton Health System

Jennifer Ford, Product Manager, Strategy, MEDITECH

The fastest-growing area of healthcare has continued to make headlines every day: genetic data promises to change the way clinicians provide care in the coming years. How can your organization manage the imminent adoption from your laboratory to ER physician to oncologist? Come see MEDITECH's new LIS Genomics Solution and participate in a robust conversation about the direction of genetics within the EHR including advanced oncology integration, mining genetic data, coding, and precision medicine.
